DIRECTIONS:

Conversion varnish should be catalyzed per label instructions. Pot life will be determined based on when material is catalyzed, not when it is filled in the can. Follow manufacturer's recommendations for dry time, recoat intervals and pot life. The material may still spray after advertised pot life is up, but film properties will not be up to conversion varnish standards.

The data on this sheet are calculated values (as formulated) and will not represent exact values for every product. For Safety and Other Precautions, read the SDS before using the product. SDS are available upon request.
